

Steel Router Stand

User Manual

Model #05150

Thank you for choosing this product from JessEm Tool Company. We appreciate your support and hope that our product serves you well. This product is designed to provide many years of reliable service provided it is used as intended and taken care of.

This user manual will assist you in assembly and general operation of this product. It is not our intent to teach you about woodworking. It is assumed that you are an experienced woodworker with the basic skills and experience necessary to use this product safely. If after reading the following instructions you are unsure or uncomfortable about safely using this product, we urge you to seek additional information through widely available woodworking books or classes.

As part of our Continuous Product Improvement Policy, JessEm products are always advancing in design and function. Therefore, there may be differences between what is shown in our catalogs, website or at retail display and what is sold at time of purchase. We reserve the right to make positive changes to our products at our discretion.

Tools Required: 3/16" Hex Key (Provided)

Assembly Instructions

1. Place two legs (part #5) on a flat surface with the castor holes facing out on either side (see Figure #3) and the leveling feet closest to you. Take the front lower brace (Part #8) and align it with the corresponding holes as seen in figure #3, ensuring the flange is oriented correctly. Using four 1/4" Washers and four 1/4"-20 x 3/8" Stainless steel Cap Screws (parts #2 and #4), loosely attach this brace to both legs. Do not fully tighten the screws at this point. All screws will be left loose until the entire stand is built.

Repeat this procedure to mount an upper brace to both legs (part #3), using the same mounting hardware as before. At this point you should have one side assembled, as seen in figure #3.

2. Take the two remaining legs and again lay them in front of you as done in Step 1. Build the rear leg and brace assembly the same way as done in Step 1, again leaving the screws slightly loose.

3. Next, take out the front assembly from Step 1, and the left and right top braces (Part #1). Using four 1/4" washers and four 1/4"-20 x 3/8" Stainless Steel Cap Screws, mount the upper side braces to the front assembly. The flanges on each brace should be mounted facing up and inward.

Repeat this process for the left and right bottom braces (part #7), again using four of the 1/4"-20 x 3/8" stainless steel cap screws (part #4) and four 1/4" stainless steel washers (part #2).

All screws should still be slightly loose at this point.

4. Take the rear leg and brace assembly from Step 2 and use the remaining eight 1/4"- 20 x 3/8" stainless steel cap screws (part #4) and eight 1/4" stainless steel washers (part #2) to enclose the stand. Once this is complete all bolts on the stand can be tightened securely with a 3/16" hex key. Do not over tighten the screws.

5. If mounting a table top to the stand, leave the top screws loose until the table top has been mounted. Then tighten all screws.

Figure #1

Item #	Part #	Description	QTY.
1	S0090-1-C	Upper Side Brace	2
2	F0348	1/4" O.D. x 5/8" I.D. Stainless Steel Washer	32
3	S0090-1-C	Upper Front and Back Braces	2
4	F0559	1/4"-20 x 3/8" Stainless Steel Cap Screws	32
5	S0090-1-C	Legs	4
